ABOUT ME

I am an enthusiastic SoC Researcher, with Physical Design expertise and a keen eye for design methodologies. I thrive in contexts where "what?" is always followed by "how?". Currently, I am looking for a chance to boost my knowledge on Computer Architectures while leveraging my expertise in SoC design. My ambition is to steer the semiconductor industry towards the path of Architecture-Design Co-Optimization, as I strongly believe that it will be a key enabler for next generation digital ICs.
